ONTIOLOGY BASED COMPETENCY MATCHING

Bridging the gap between vocational education and the workplace

The OntoHR partnership consists of:
- Corvinno Technology Transfer Center, Hungary
- Amsterdam Business School, The Netherlands
- Dida Network Srl, Italy
- Qompas bv, The Netherlands

For more information please consult: www.ontohr.eu
The objective of the OntoHR project is to develop an HRM system that decreases the gap between higher vocational education and the labour market. The partnership is working together on an eLearning environment, which will be equipped to sample knowledge, skills and competences of VET students and match it with the selection criteria of specific job roles in Europe. Feedback will be provided on job role fit and complementing eLearning programmes.

DELIVERABLES

- Map qualifications in vocational education to current and valid job roles
- Test and evaluate students on the basis of valid, labour market driven competencies
- Identify missing competencies and provide learning content needed to acquire them
- Address the weaknesses of particular VET curricula, and thereby provide ad-hoc support
